Subject FW: My updated White Paper

Looks like we might want to read the Sierra Club and CATF comments. I'll see if I can get my hands on them.

Subject: RE: My updated White Paper

Chuck's paper is an update from the one he presented in January. I have not looked at it enough to ascertain the key differences. Because of time limitations, we discussed all of the white papers in a 4 hour block one day in January. Each author was given an opportunity to make a presentation - and then there was an opportunity for the Work Group to comment and ask questions. I believe Shannon Broome presented the paper for Chuck. And if I recall correctly, she did so over the phone. So it was not the best conditions for a full discussion. The reaction I recall came primarily from the attorneys representing Sierra Club and Clean Air Task Force. They disagreed with the legal analysis and directed Shannon to the pages in their tailoring rule comments that were on point. I do not recall comments from States and others. No one drafted a rebuttal. At the end of the 4 hour discussion there was a decision to incorporate some points from the fuels and energy efficiency white papers into Phase I recommendations. Except primarily for Eric and myself and the White Paper authors, the Work Group voted to not even include the White Papers in the appendix - thus there was no forum/need for a rebuttal.

Subject: RE: My updated White Paper

Mark and Eric—

Chuck sent me his paper on PSD applicability, and I was wondering two things---was there discussion about this issue during the Phase 1 workgroup discussions (I seem to remember that this is one of those issues you guys decided not to spend time on, but just wanted to confirm) and, to your knowledge, has anybody written anything else on this topic, especially making the opposite argument?

Thanks.....

Janet

Subject: My updated White Paper

To: CAAAC and the Climate Change Work Group

Consistent with our discussion at the CAAAC meeting last week that new or revised White Papers should be circulated by today, I am circulating an updated version of my paper on the NAPT Approach (i.e., "No Automatic PSD Trigger") regarding bounding the scope of the PSD problem that we have to address in our work. This updated paper has an attachment with examples of how the NAPT approach would work. It also has a one-page Q&A attachment.

I would be happy to discuss with any of you.

Regards,
Chuck
