## External Sender

Hey All - Just one more check in for next week. We have a group of leaders in the community meeting up 6:15PM Monday at OceanPrime and 8:00AM Tuesday at Mercantile. If you want to jump into either of these they will be a casual time for folks in the Denver/CO community to (re)connect and we'll appreciate the ideas about how we can make the event in Oct focused on resiliency a great one.

If you will end up missing us this time but had some ideas that could help, here's a few areas we'd welcome your suggestions:

- Getting Gov Polis response on opening remarks
- Featured remarks for 26th (After State Senator Hansen and before CEOs from WAPA, La Plata, Holy Cross and maybe Xcel — pending invites with White House and Sen Sinema)
- Rounding out these sessions (Im happy to share the specifics if you may have ideas)
  1. Building community resiliency (looking for non energy perspectives like first responder, hospital network, fire dept, water district that counts on continuity of the grid — have City of Boulder, Sunnova and CO Rural Electric Assoc)
  2. Optimizing distribution grid with advanced forecasting (looking for utility doing interesting work in this space — have Amazon, OSI and NREL)
  3. Innovation and solutions for under grounding (pretty good but open to an idea or two — Have Daquesne and PG&E)
  4. Customer marketplace for EV charging and other resiliency solutions (need a utility and ok if its customer engagement on resiliency beyond EV charging — have Uplight and Opinion Dynamics)
  5. Solutions for extreme weather scenarios (need a utility, maybe a moderator — have Camus, Holy Cross and WeaveGrid)
  6. Refining interconnection processes (maybe need moderator — have IREC and Sunrun)
- Members in the community who are critical for ensuring resiliency and rely on continuity of electricity supply like: first responders, wildfire managers, water departments, hospital networks and others — we just want them there but are also happy to loop them into the program at a few places
- Ideas for interactive huddle discussion topics — two people paired up to help lead a

discussion around an interesting resiliency topic

- Also hotels sounds pretty full. We are chatting with Magnolia and Oxford but probably need another one to offer an option for folks coming into town to stay. Hyatt, Westin and some of the other big ones sounded like they didnt have much space.

- Idea on shuttles that may be able to take people from central downtown to Empower Field — EV would be great.

On Aug 15, 2022, at 10:44 PM, Bryce Yonker <[bryce@gridforward.org](mailto:bryce@gridforward.org)> wrote:

Hi CO Advanced Energy Friends - Im heading to Empower Stadium next Monday to do some final planning for the GridFWD event in Oct around resiliency. I wanted see if some of our friends and supporters (you all and others you think may fit) would like to join up for a dinner on Monday night or breakfast on Tuesday morning. Really both times will mostly be social with local members in the community who are driving grid modernization ahead, but it will be great to get a few ideas around where plans with the event are heading.

A very brief recap of where things are:

- The overall gathering Oct 24-26 is coming along really well. We still expect 400-500+ people

- Some of the contributors confirmed in the agenda are: US Congressman Neguse, State Senator Hansen, GMs from Holy Cross, La Plata, Tacoma Power and United, leadership from DOE offices of at least grid and loan program, execs from NREL, Xcel, Google, Portland General, WAPA, CO PUC, CA Energy Commission, Microsoft and others.

- Tours on Oct 24 at NREL, CSU and Panasonic look good. Some kind of group at the Bronco game on the 24th does not look like its happening

- We could use a few nudges on places for the program and other areas to round out the agenda — happy to outline or chat about it but among them would be Gov Polis for opening; utilities on sessions about advanced forecasting, customer engagement for resiliency, and solutions for extreme weather scenarios; and members in the community who are critical for ensuring resiliency like first responders, wildfire managers, water departments, hospital networks and others that both need continuity of electricity but also provide core community resources in times of disruption.

- The innovation pitch contest has a great set of judges but we need early stage companies to apply. The discussion topics that are usually a highlight are just starting to come into view and ideas will be great for making those strong.

If you cannot meet up next week but may be open to share some feedback, I was thinking about a call later this month with our local friends/supporters before we release the initial

agenda.

My inbox is a disaster in its own way so if you have something into me that I have not gotten back on yet, apologies. Hopefully this chance to connect will help us sync up. I can blame it on my time off (which was amazing with the family), or the wild few weeks with that energy package (what a milestone in congress, a major step in support of advancing the grid!) but really it's just tough to keep up with all the moving parts around this.

Hope the summer is going well for you. Let me know if you may like to sync up next week.

**Subject:** [EXTERNAL] EPA petition to phase out GHGs

Dear all,

We've informally advised a group including Dr. Jim Hansen on a petition they are planning to file with EPA to phase out GHG emissions under the authority of the Toxic Substances Control Act (TSCA). Their factsheet on this effort is attached; more info is available here:

<https://cprclimate.org/about/actions-campaigns/petition-to-epa/>

They're planning to file on Thursday, June 16, and looking for groups and individuals to endorse this effort. While it may be a long shot, there is an actual legal standard that requires EPA to regulate chemicals that pose an unreasonable risk of injury to health and the environment, and a public right to petition to compel rulemaking; if EPA refuses to act, this could end up in litigation.

We'd love to hear your thoughts on this, and whether you're inclined to support the effort! Happy to answer any questions as best we can; although we have advised, this is not our project. If you have any concerns about EarthRights publicly endorsing this, please let us know.

Sincerely,  
Marco

**Subject:** City of Boulder Support for Hearings on Climate Change

**External Sender**

Hi Jonathan,

I'm writing on behalf of the Climate Protection and Restoration (CPR) Initiative to seek your help in securing a venue and support from the City of Boulder for a hearing on rulemaking for EPA regulation of greenhouse gases. Thank you for supporting our recent petition to the EPA to begin rulemaking by the EPA under authority of the Toxic Substances Control Act (TSCA). I believe you are likely the person responsible for obtaining endorsement by the City of Boulder as well. As you may know, our petition was rejected mostly on the ludicrous grounds that the passage of the Inflation Reduction Act will be enough to solve the climate problem. Under TSCA, we have the option of filing a civil lawsuit to force the EPA to take action, which we are considering. We may also file a new petition using the rejection letter from the EPA as a roadmap to obtain a positive result.

In the meantime, we plan to begin doing some of what the EPA would do if the petition were approved – that is to hold public hearings on what a rule should look like. Since both the City of Boulder and the County of Boulder endorsed our petition, we believe that Boulder would be a great place to hold one of the first hearings. Thus, I am writing to seek your help.

Tentatively, the hearing would be on November 1, say from 10 am to 2 pm. If at all possible we would like to do this in the City Council Chamber. In any case, I would like to talk about this and other possibilities. Is there a time when we could talk by phone?

All the best,  
John

## External Sender

Oct. 12, 2022

Hi John,

Great to have met last week.

Our ad-hoc CPR Initiative public hearing committee includes Donn Viviani (CPRI board president), Stefanie Herrington (CPRI BOD), Nelson Bonner (CPRI BOD), Kali Martin (CPRI Communications Consultant), as well as John Birks and me. [All of them are copied here.]

We had an excellent meeting on Monday, and agreed on the following:

- (1) We welcome the City of Boulder's co-sponsorship,
- (2) We'd welcome Boulder County's co-sponsorship as well
- (3) We think the title of the public hearing should be this:  
*Action on Climate: What More Should the US Do Now?*
- (4) We were thinking the hearing should start on Nov. 1 at 9am (not 10am) and take a break for lunch of 45 minutes at 12noon.
- (5) We'd like to do a technology check starting one hour before the hearing.
- (6) We are working on a registration page as we speak, and will need details of how people may remotely participate (zoom link or whatever)
- (7) I'll be ready with a draft op-ed piece early next week,
- (8) We like the idea of a joint press release, and we'd like to release that on or before Oct. 25, then send it our again on 10/31
- (9) Our group discussed and came to strongly support the idea of John Birks, copied here, inviting some FF industry participants. But the group also wishes to invite some experts on carbon free energy and GHG removal.
- (10) The group approved me reaching out to Hunter Lovins, a petition endorser who is an expert on natural climate solutions
- (11) Stefanie Herrington will assist at the hearing in calling persons in order of their registration to provide their comments, and will function as timekeeper.
- (12) We will have note cards, created by Kali, for use at the hearing for audience members to ask questions. Nelson will circulate those and collect them, and funnelled to Stefanie as

warranted.

(13) Kali will monitor the online chat in case qs are coming remotely; she will filter out some and provide the rest to Stefanie who will then select for our response as or if warranted at the hearing.

(14) We anticipate that most or all our individual expert Petitioners will testify; two in person (Donn and John) and 3 remotely (either live or by prerecording).

(15) We will take written testimony as well as oral, for persons who wish to say more for the record than permitted by our 5 minute time limite

(16) The group approved the idea that pre-registered testifiers shall be limited to 5 minutes unless there are few enough persons who register that we could extend that limit up to, say, 10 minutes. The group also approved that persons wishing to testify who show up without pre-registering should be able to testify for up to 2 minutes towards the end of the hearing -- but again, written testimony will be accepted as well.

(17) The group also recommends that we keep the record open for one week after the hearing for written supplementation.

Well, I think that's all to report at this moment. Could we do a zoom planning meeting sometime on Monday Oct 17 to nail down or go over any of this or with respect to any new developments?

Thanks, Dan. I have not heard back from KC yet, so I think its fine to remove that statement. I will certainly include the reference to our lawsuit in my comments. Thanks all!

2022.10.25

Hi Jonathan and Emily,

The [release we ready now](#) incorporates some of your edits, and then some additional edits from me. I took out, however, the ambiguous statement that people would be testifying "to" EPA. EPA has been invited, true, and we could also have said that, but even that I think is a bit too pugnacious right now and so did not.

However, Jonathan, if KC says "yes," we can update the web event page and this press release (even after release) accordingly -- just let us know.

Also, Jonathan, in preparing your opening, I think it would be good to mention the City's lawsuit against the carbon majors.

In addition, I wanted to let you know that the well-known climate scientist Kevin Anderson likely will refer to [this important document](#) in his presentation.

We are planning to alert the press at 10am pacific today, so please let us know if there's anything else.

Thanks much,

Dan

Hi Emily, et al.,

Thank you for your time today and for confirming that it will be possible for all petitioners to go first at the hearing.

I have attached a draft of our proposed agenda / run of show for you and your team so that we can all be on the same page.

The following are the ways we would like to make this agenda known to participants:

- 1) Post on our [website event page](#)
- 2) Email to registered participants 1-2 days before the event

- 3) Display in powerpoint presentation at the event (assuming this is feasible)
- 4) Dan will convey in his opening remarks at the event

We welcome all of your thoughts, questions or concerns (if any) on both our proposed agenda and the ways we plan on communicating it to participants.

With appreciation for your feedback,

## **Kali Martin**

Good morning,

Thanks again for the productive call this morning. One quick update:

It is possible for the run of show to have all the petitioners (in-person and virtual) go first. I just suggest being clear about that with the audience, so they understand the flow of the event and when they'll get their chance to speak.

When you put together your run of show, please indicate the speaker flow and whether they'll be in-person or live on Zoom.

Thanks!

Emily

Emily,  
Did you receive my shared file with expert Rick Heede's testimony?  
That should be played tomorrow commencing at minute 1:18, right after I orally introduce him at the hearing (thus, skipping my haltering on-tape introduction).  
Thanks,  
Dan

Thanks Kali! They all have received a zoom link and will get a reminder tomorrow morning.

Can you clarify who the petitioners are?

### External Sender

Hi Emily,

I just want to check in with you to make sure that our lists for remote participants are matching. We've also had a couple more people register on our website since I last updated you.

Attached is our current list of remote participants. There are 2 more who registered on Saturday, one of them is one of our Petitioners, who we would like to have speak before the other in-person speakers.

Could you please confirm if all of these people have been sent a Zoom link?

On a separate but related note, I noticed that your Zoom event is titled a bit differently than what we've called it on our website, event materials, and email communications with participants. Is it too much to ask for you to edit the title of the event to be "Public Hearing on Climate Action" or "Boulder Climate Action Hearing," and send the link one more time to everyone registered remotely, so its at the top of their inbox tomorrow and they recognize what it's for?

Thank you for your help,

Kali
